spring

winter

**1261 SW THORNTON DRIVE,
WHITE SALMON WA**
**GC: Mealy and Heindel with assistance of
Robert Nuckoles and Hawk Butte**
(completed 2016)

What architects' house is ever complete? After 1 1/2 years of living and working here, we continue to use the house as a design lab and studio. The openness, daylighting, artificial lighting, radiant heat, passive cooling: all bring us great pleasure. The interior of the guesthouse beside the garage is designed to provide small and cozy spaces to contrast with the openness of the main house and provide more sleeping quarters for frequent visitors. Completion of that is expected in 2018. The design and construction of the exterior landscaping has begun and will be a gradual process — meadow grooming, soft terraces, more native plantings .

summer

Other projects that are currently underway:

- houses in Lyle and White Salmon
- ADU cottages in White Salmon and Trout Lake
- the renovation of a commercial garage in Bingen into an event space
- master planning of business properties
- interior renovations

What great projects and great clients, all around!

We continue to enjoy both renovation and new construction projects, as well as design and structural consultations for clients who need just a bit of advice to bring their vision to reality.

Please explore the website for more work of ours.

If you have a project in mind, we would love to hear from you!
